+91-8793168776    snehakharote3006@gmail.com    linkedin.com/in/snehakharote30    github.com/snehakharote30    LeetCode

## OBJECTIVE

Aspiring AI/ML Engineer with hands-on project experience in LLM-based applications, RAG pipelines, and full-stack development. Familiar with cloud deployment and REST APIs. Seeking roles in AI/ML Engineering or Software Engineering with an AI focus.

## EDUCATION

|                                                                                                |                                                     |
|------------------------------------------------------------------------------------------------|-----------------------------------------------------|

## PROJECTS

**PrepTraQ – AI Voice Interview Platform** | *Next.js, Firebase, Gemini API, Deepgram, ElevenLabs* **2026**

- Built an AI-based mock interview platform integrating speech-to-text, LLM-based response generation, and text-to-speech for interactive interview practice.
- Designed responsive interview workflows supporting real-time voice interaction and transcript generation using Deepgram for STT and ElevenLabs for TTS.
- Implemented transcript-based feedback generation and per-answer scoring using Gemini API.
- Built session management and interview history tracking using Firebase, enabling users to review past interviews and track improvement over time.

**Ragobot – RAG-based AI Assistant** | *Python, LangChain, ChromaDB, Gemini API, Streamlit* **2025**

- Built a Retrieval-Augmented Generation (RAG) chatbot using LangChain, ChromaDB, and Gemini API for context-aware responses over custom documents.
- Implemented document chunking, embedding generation, and vector similarity search pipeline with conversational memory for multi-turn interactions.
- Added support for PDF ingestion and web-based knowledge retrieval with source attribution.
- Built an interactive Streamlit interface for uploading documents, querying the knowledge base, and viewing retrieved context alongside AI responses.

**AI Resume Analyzer** | *Python, Streamlit, NLTK, MySQL, Plotly* **2024**

- Built an NLP-based resume analysis tool supporting automated PDF parsing, keyword extraction, and skill identification using NLTK.
- Generated visual analytics on skill distribution and keyword frequency using Plotly; stored candidate data in MySQL for persistent session tracking.
- Designed a Streamlit-based UI allowing users to upload resumes, view extracted skills, and receive suggestions for improvement based on job role keywords.

## TECHNICAL SKILLS

**AI / ML & GenAI:** LangChain, ChromaDB, RAG Pipelines, NLTK, Prompt Engineering, Gemini API, Vector Databases

**Web & Databases:** React.js, Next.js, Streamlit, REST APIs, Firebase, MySQL

**Cloud & Tools:** AWS (EC2, S3, IAM), Vercel, Git, GitHub

**Programming:** Python, Java, C++, SQL, JavaScript

**Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems

## CERTIFICATIONS

**AWS Certified Solutions Architect – Associate**, Amazon Web Services **2026**

**Oracle Certified Java Foundations Associate**, Oracle **2025**

**MERN Full Stack Development**, Ethnus **2025**

**NPTEL Cloud Computing · Python Essentials · AI/ML Fundamentals** **2024**

## EXTRACURRICULAR

**E-Cell Club, VIT Bhopal** **2024 – Present**  
*Core Member*

- Organized entrepreneurial events, startup pitch competitions, and workshops in collaboration with cross-functional student teams.
- Coordinated with technical and design teams to manage campus-wide initiatives and drive student participation in innovation activities.
- Assisted in outreach and communication efforts to engage students across departments and promote E-Cell programs on campus.
